

California OES Weather Threat Briefing

Sunday, May 26, 2019
9:00 AM PDT

Day 1: Mountain snow over the Sierra and southern mountains will cause travel impacts. Gusty winds across much of the central and southern portions of the state will impact travel and may cause localized areas of downed trees and power lines.

WEATHER KEY POINTS

05/26/19 - 06/01/19

Sunday-Monday

- Another storm system will move through the state
 - Brief moderate to heavy rainfall is possible with any thunderstorms that form, but debris flows are not likely
 - Accumulating snows of 6-12 inches above 6000-6500 feet in the Sierra will create travel impacts to Sierra passes
 - Precipitation will also occur across southern Inland region and Southern region Sunday into Sunday night
 - Rainfall amounts in the San Bernardino and Riverside County Mountains could reach 0.5-1.0 inch, with localized amounts reaching 1-2 inches
 - Rainfall rates expected to remain below 0.5 inch per hour at this time
 - Snow levels in the San Bernardino and Riverside County Mountains will fall to around 5500 ft by Sunday evening, with a few inches of snow possible
 - Gusty winds across much of the central and southern portions of the state will impact travel and may cause localized areas of downed trees and power lines

Tuesday-Saturday

- Trending drier across much of the state outside of a chance of showers and thunderstorms over the Sierra each day
